WORK EXPERIENCE

Roman Property

Fullstack Developer

Oct 2025 – Present

CRM Roman

Responsible:

- Designed and developed **.NET backend** utilizing **Clean Architecture** and **Domain-Driven Design (DDD)**, building **RESTful APIs** to isolate complex CRM business rules and standardize data integration across web and mobile .
- Designed and implemented end-to-end CRM workflows, including **lead management**, **customer segmentation**, **communication tracking**, **task automation**, and **analytics reporting**, enabling efficient customer relationship management and data-driven decision making.
- Developed **asynchronous** background services using **.NET IHostedService** and **RabbitMQ** to automate lead lifecycle workflows, including **auto-recall**, **scheduling**, **cooldown handling**, and **notification** processing, successfully processing **10,000 leads** monthly and reducing manual follow-up operations
- Implemented a comprehensive real-time notification using **SignalR** for **web** and **Firestore (FCM)** for **mobile devices**, enabling instant lead assignments and cross-platform status synchronization.
- **Secured** RESTful APIs using **JWT Authentication** and **dynamic Role-Based Access Control (RBAC)** via **.NET Policy-Based Authorization**, ensuring granular access control and safeguarding sensitive CRM data.
- Optimized the analytics dashboard performance by implementing **Redis caching** and advanced **SQL indexing strategies**, reducing complex report generation
- Built a modern Admin Dashboard using **Angular**, **TailwindCSS**, **Signals**, **RxJS**, and **Lazy Loading** to enhance maintainability, optimize state management, and improve application performance.
- Automated build, testing, and deployment processes utilizing **GitLab CI/CD** and **Docker**, cutting deployment time from **15 to under 10 minutes** while completely eliminating manual intervention

Tech Stack:

- Backend: C#, ASP.NET Core,
- Database ORM & Cache: SQL Server, Entity Framework Core, Redis
- Frontend: Angular, TypeScript, TailwindCSS
- Real-time & Message Broker: RabbitMQ, SignalR, Firebase Cloud Messaging
- Docker, GitLab CI/CD

WORK EXPERIENCE

Novaon Tech Company

Mar 2024 – Sep 2025

Backend Developer

ClickTracking

Technology used:

- Backend: C#, ASP.NET,
- Database & ORM: SQL Server, Entity Framework (Code First Migrations)
- Frontend: HTML, CSS, JavaScript, jQuery (AJAX)
- API Integration: Google Ads API, Google Analytics API

Responsible:

- **Collect Google Ads API data** and present it to users, allowing them to monitor the effectiveness of click fraud protection and track the performance of their advertising campaigns.
- Implemented **background jobs** to send alerts for expiring services and **automate report generation**.
- **Collected and aggregated advertising campaign data** from multiple sources to create detailed summary tables, then visualized key performance metrics such as impressions, clicks, and conversions in an interactive dashboard using **Chart.js**.

OnMarketer

Technology used:

- Backend: ASP.NET, C#, ADO.NET
- Database & ORM: SQL Server, Entity Framework (Code First Migrations)
- Frontend: HTML, CSS, JavaScript, jQuery (AJAX)
- API Integration: Google Sheets API, HubSpot API

Responsible:

- Implemented **customer data synchronization with Google Sheets** using **Google Sheets API**, ensuring **real-time** updates and efficient data management. Automated the process of pushing customer information from the system to Google Sheets for campaign tracking and analysis
- Implemented **integration with HubSpot API to synchronize customer data**, automate marketing workflows, and manage leads efficiently. Enabled seamless communication between internal systems and HubSpot, improving campaign management and customer engagement.

SKILLS

Additional skills

- Interface design skills with figma.
- Teamwork.
- Communication and presentation skills.

LANGUAGE

- English: Level B2

CERTIFICATIONS

- Software Development Lifecycle Specialization.
- Web Design for Everybody: Basics of Web Development & Coding Specialization.
- Computer Communications Specialization.
