

PHAM VAN KHOA

DOTNET DEVELOPER

Address: Ha Noi, Viet Nam

Phone: 0347126575

Email: Zankhoa2203@gmail.com

GitHub: <https://github.com/Zankhoa>

LinkedIn: <https://www.linkedin.com/in/zankhoa>

EDUCATION

FPT University

- Software Engineering

Sep 2022 - April 2026

PORTFOLIO

<https://devzankhoaa.vercel.app>

Tech Stack: Frontend: Next.js, TypeScript, Tailwind CSS

Link Git: <https://github.com/Zankhoa/MyProfile>

WORK EXPERIENCE

.Net Developer

Novaon Tech Company

March 2024 – Dec 2025

ClickTracking

Technology used:

- Backend: C#, ASP.NET,
- Database & ORM: SQL Server, Entity Framework (Code First Migrations)
- Frontend: HTML, CSS, JavaScript, jQuery (AJAX)
- API Integration: Google Ads API, Google Analytics API

Responsible:

- **Collect Google Ads API data** and present it to users, allowing them to monitor the effectiveness of click fraud protection and track the performance of their advertising campaigns.
- Implemented **background jobs** to send alerts for expiring services and **automate report generation**.
- **Collected and aggregated advertising campaign data** from multiple sources to create detailed summary tables, then visualized key performance metrics such as impressions, clicks, and conversions in an interactive dashboard using **Chart.js**.

OnMarketer

Technology used:

- Backend: ASP.NET, C#, ADO.NET
- Database & ORM: SQL Server, Entity Framework (Code First Migrations)
- Frontend: HTML, CSS, JavaScript, jQuery (AJAX)
- API Integration: Google Sheets API, HubSpot API

Responsible:

- Implemented **customer data synchronization with Google Sheets** using **Google Sheets API**, ensuring **real-time** updates and efficient data management. Automated the process of pushing customer information from the system to Google Sheets for campaign tracking and analysis
- Implemented **integration with HubSpot API to synchronize customer data**, automate marketing workflows, and manage leads efficiently. Enabled seamless communication between internal systems and HubSpot, improving campaign management and customer engagement.

WORK EXPERIENCE

Project Banking System (Personal project)

Tech Stack: C# ASP.NET Core, ReactJS, SQL Server, Redis, RabbitMQ, CQRS.

Responsible:

- Architected a robust banking system utilizing **Clean Architecture**, **CQRS**, and **DDD patterns** for high **scalability** and maintainability.
- Implemented secure internal/interbank fund transfers and asynchronous transaction logging via **RabbitMQ**.
- Developed a responsive and dynamic frontend using **ReactJS** and **Tailwind CSS**, leveraging React Hooks for efficient **state management**, seamless **API integration**, and rendering complex transaction histories..
